

REPORT TO: PERFORMANCE & AUDIT COMMITTEE –19 NOVEMBER 2025

REPORT ON: DUNDEE HEALTH AND SOCIAL CARE PARTNERSHIP PERFORMANCE REPORT – 2025-26 QUARTER 1

REPORT BY: CHIEF FINANCE OFFICER

REPORT NO: PAC-2025

1.0 PURPOSE OF REPORT

- 1.1 The purpose of this report is to update the Performance and Audit Committee on 2025-26 Quarter 1 performance against the National Health and Wellbeing Indicators and 'Measuring Performance Under Integration' indicators. Data is also provided in relation to Social Care – Demand for Care at Home services.

2.0 RECOMMENDATIONS

It is recommended that the Performance & Audit Committee (PAC):

- 2.1 Note the content of this summary report.
- 2.2 Note the performance of Dundee Health and Social Care Partnership, at both Dundee and Local Community Planning Partnership (LCPP) levels, against the National Health and Wellbeing Indicators as summarised in Appendix 1 (tables 1, 2 and 3).
- 2.3 Note the performance of Dundee Health and Social Care Partnership against the 'Measuring Performance Under Integration' indicators as summarised in Appendix 1 (table 3).
- 2.4 Note the number of people waiting for a social care assessment and care at home package and associated hours of care yet to be provided in Appendix 2.

3.0 FINANCIAL IMPLICATIONS

- 3.1 None.

4.0 BACKGROUND INFORMATION

- 4.1 The Quarterly Performance Report analyses performance against the National Health and Wellbeing Indicators. 5 of the 23 National Health and Wellbeing Indicators are monitored quarterly (emergency admissions, emergency bed days, readmissions, falls admissions and delayed discharge bed days lost). The quarterly performance report also summarises performance against indicators in the Measuring Performance Under Integration (MPUI) suite of indicators for four out of six high level service delivery areas – emergency admissions, emergency bed days, accident and emergency and delayed discharges, end of life and balance of care. Further information regarding these indicators and the methodology used to report these indicators can be found in Appendix 3.

- 4.2 The Public Bodies (Joint Working) (Scotland) Act 2014 and associated regulations and guidance prescribes that Partnerships must compare performance information between the current reporting year and the preceding five reporting years. For Q1 2025-26, quarterly performance reports performance is measured against the 2020-21 baseline year and because 2020-21 performance is the pandemic era, hospital use may have been lower due to lockdowns and service disruptions, 2018-19 data has also been provided for all indicators as a supplementary baseline.

5.0 QUARTER 1 PERFORMANCE 2025-26 – KEY ANALYTICAL MESSAGES

- 5.1 Key analytical messages for the Quarter 1 2025-26 period are:

- Significant variation by Local Community Planning Partnership (LCPP) is still apparent, with poorest performance for many of the National Indicators in the most deprived LCPPs.
- The 2020-21 baseline reflects the pandemic period which would be affected by lockdowns, reduced hospital admissions, disrupted service and change in patient pathways. Therefore comparison has also been made to the 2018-19 baseline.

Performance against the 2020-21 baseline

- Performance is poorer for emergency admissions rate per 100,000 for 18+ age group, emergency bed day rate and the 28 readmissions rate.
- Performance has improved for hospital admissions due to a fall (65+), standard and code 9 delayed discharge bed days lost rate per 1,000 for 75+ age group.
- Emergency admissions rate (18+) has increased in all LCPP areas, with the most significant rise in The Ferry (37.2%) and Coldside (26%).
- Emergency bed days rate (18+) show variation across the LCPP areas, West End, Lochee and North East have shown an improvement. The remaining five LCPP have shown a deterioration with The Ferry showing an increase of 25.2%.
- 28 day readmission rate per 1,000 admissions (18+) has increased by 4% (deterioration). The Ferry (13%) and Maryfield (12%) have the highest increases. Lochee is the only LCPP to show an improvement.
- Hospital admissions due to a fall (65+) show an improvement of 2%. Improvement is notable in Lochee, West End and The Ferry. Five LCPP show deterioration, with the highest increases in North East (22%) and Strathmartine (13%).
- Delayed Discharge bed days lost due to standard delays (age 75+) have improved by 23% across Dundee. East End showed the most significant improvement at 58%, followed by North East at 51%. Strathmartine was the only LCPP area to show a worsening trend.
- Delayed Discharge bed days lost due to code 9 delays (age 75+) have improved by 24% across Dundee. However, there are extreme variations at LCPP level, Maryfield (-100%) and North East (-94%) show significant improvements. In contrast, The Ferry (+525%) and Coldside (+106%) have seen substantial increases indicating a deterioration in performance.

Performance against the 2018-19 baseline

- Performance is poorer for emergency admissions rate per 100,000 for 18+ age group, 28 days re-admissions rate (18+), hospital admissions due to a fall (65+) and delayed discharge - code 9 delays (75+).
- Performance has improved for emergency bed days rate (18+) and delayed discharge - standard delays (75+).

- Emergency admissions rate (18+) has increased in all LCPP areas, with the most significant rise in The Ferry (25%) and Strathmartine (17.4%).
- Emergency bed days rate (18+) shows improvement of 13% across Dundee, with Lochee showing an improvement of 25.8% and West End (22.6%). North East and The Ferry had modest increases in comparison to 2018-19 baseline.
- 28 day readmission rate per 1,000 admissions (18+) has increased by 4% indicating a deterioration. West End and Coldside experienced the highest increases, both at 23%. Lochee, East End and Strathmartine showed improvements.
- Hospital admissions due to a fall (65+) have deteriorated by 2% across Dundee. The largest increase was seen in Maryfield (18%), East End (17%) and North East (14%), indicating a worsening trend. West End (-16%) and Coldside (-10%) showed an improvement with fewer admissions.
- Delayed Discharge bed days lost due to standard delays (75+) shows 52% improvement across Dundee, all LCPP showed an improvement with East End (77%) and Lochee (66%) showing significant improvement.
- Delayed Discharge bed days lost due to code 9 delays (75+) have deteriorated by 8% across Dundee, however there are notable variations across LCPP. Strathmartine and North East showed improvements, with reductions of 88%. West End (+232%) and The Ferry (+138%) have experienced significant increases, indicating deterioration.

5.2 Public Health Scotland publishes a report on the number of people who are waiting for a Social Care and Care at Home service provided by the Health and Social Care Partnerships. The information, contained in Appendix 2, shows the number of people waiting for an assessment for a package of care to allow them to live at home or in the community and the number of hours of care that has been assessed but not yet delivered. The information is presented by people waiting in hospital or waiting at home / in the community for the care at home service to be delivered.

Data published from 15 January 2024 onwards reflects improved definitions and therefore caution should be taken when comparing with figures prior to this date.

The number of people waiting for assessments is showing an upward trend while the number of people waiting for care at home packages remains low.

In Dundee, as of 29 September 2025:

- 0 people waited in hospital and 164 people waited in the community for a social care assessment. 0 people have waited in hospital each week since 17 October 2022.
- 2 people were assessed and waiting for a care at home package in hospital (32 hours yet to be provided).
- 3 people were assessed and waiting for a care at home package in the community (28 hours yet to be provided).
- For those already in receipt of a care at home package 61 additional hours were required and not provided.

6.0 POLICY IMPLICATIONS

6.1 This report has been subject to the Pre-IIA Screening Tool and does not make any recommendations for change to strategy, policy, procedures, services or funding and so has not been subject to an Integrated Impact Assessment. An appropriate senior manager has reviewed and agreed with this assessment.

7.0 RISK ASSESSMENT

Risk 1 Description	Poor performance against national indicators could affect outcomes for individuals and their carers, spend associated with poor performance and the ability of the IJB to deliver fully commitments set out in the Strategic and Commissioning Plan.
Risk Category	Financial, Governance, Political
Inherent Risk Level	Likelihood 3 x Impact 5 = Risk Scoring 15 (which is an Extreme Risk Level)
Mitigating Actions (including timescales and resources)	<ul style="list-style-type: none">- Continue to develop a reporting framework which identifies performance against national and local indicators.- Continue to report data quarterly to the PAC to highlight areas of exceptional performance (poor and excellent).- Continue to support operational managers by providing in-depth analysis regarding areas of poor performance, such as around readmissions to hospital and falls related hospital admissions.- Continue to ensure that data informs operational practices and improvements and also that operational activities and priorities are used to interpret trends shown by the data.- Work with operational managers to identify areas of poor performance that result in operational risk and undertake additional analysis as required.
Residual Risk Level	Likelihood 3 x Impact 3 = Risk Scoring 9 (which is a Moderate Level)
Planned Risk Level	Likelihood 2 x Impact 3 = Risk Scoring 6 (which is a Moderate Risk Level)
Approval recommendation	Given the moderate level of planned risk, this risk is deemed to be manageable.

8.0 CONSULTATIONS

8.1 The Chief Officer, Heads of Service, Health and Community Care and the Clerk were consulted in the preparation of this report.

9.0 BACKGROUND PAPERS

9.1 None.

There was an increase in the emergency admissions rate by 10.6% in Q1 2025-26 compared with the 2018-19 baseline. This equates to an increase of 1,650 emergency admissions (deterioration).

Emergency admissions showing an increasing trend since the pandemic.

Emergency Admissions Numbers from A&E (MSG)

1,627 more emergency admissions from A+E in Q1 25/26 compared with the 2020/21 baseline.

1,347 more emergency admissions from A+E in Q1 25/26 compared with the 18/19 baseline.

Peak at Q3 but a reduction in Q4 and Q1 2025/26.

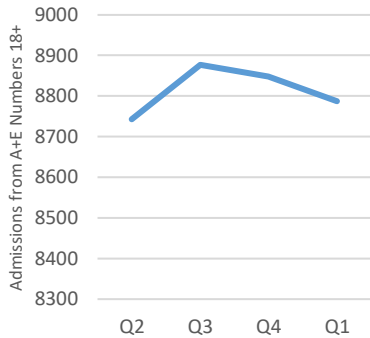

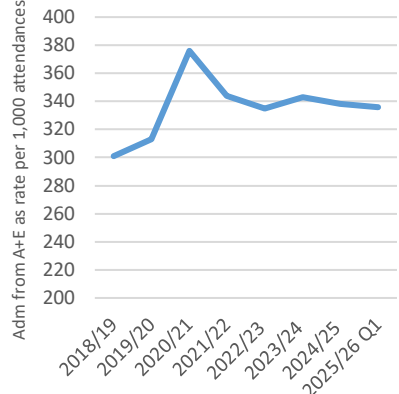

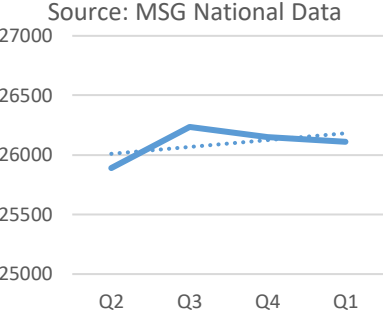

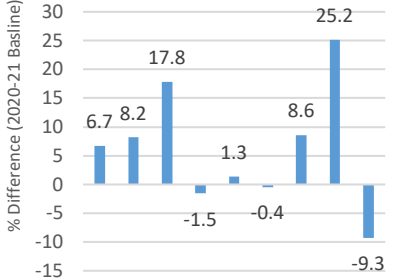

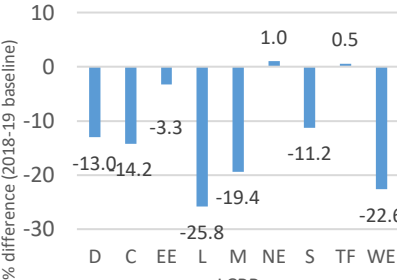

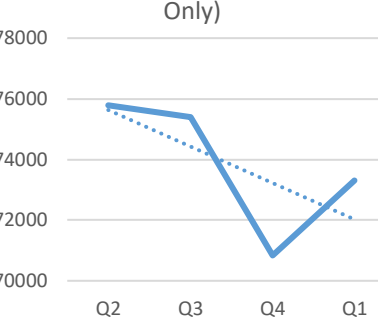

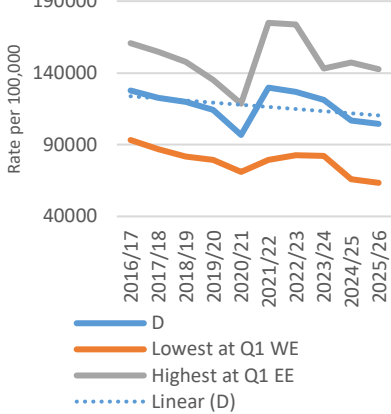

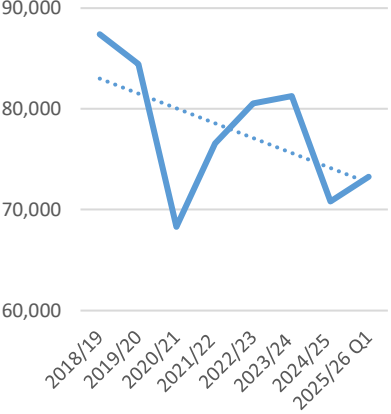

Increasing trend post pandemic with Q1 2025/26 showing a slight drop.

APPENDIX 2 SUMMARY OF SOCIAL CARE – DEMAND FOR CARE AT HOME SERVICES DUNDEE

This report is an assessment of the demand for Care at Home services provided by Health and Social Care Partnerships. The information shows the number of people waiting for an assessment for a package of care to allow them to live at home or in the community and the number of hours of care that has been assessed but not yet delivered. The information is presented by people waiting in hospital or waiting at home/community for the care at home services to be delivered.

The data items submitted from 15 January 2024 onwards reflects improved definitions and therefore comparing figures before this date should be done with caution.

Chart 1

In Dundee as at 29 September 2025

- 0 people waited in hospital and 164 people waited in the community for a social care assessment.
- 0 people have waited in hospital each week since 17 October 2022.

Chart 2

In Dundee as at 29 September 2025:

- 2 people was assessed and were waiting in hospital for a care at home package.
- 3 people were assessed and were waiting in the community for a care at home package.

Chart 3

In Dundee as at 29 September 2025:

- 2 people were assessed and waiting for a care at home package in hospital (32 hours yet to be provided).
- 3 people were assessed and waiting for a care at home package in the community (28 hours yet to be provided).

Chart 4

In Dundee as at 29 September 2025:

- For those already in receipt of a care at home package 61 additional hours were required and not provided.

APPENDIX 3 – DATA SOURCES USED FOR MEASURING PERFORMANCE

The Quarterly Performance Report analyses performance against National Health and Wellbeing Indicators 1-23 and Measuring Performance Under Integration (MPUI) indicators. 5 of the 23 National Health and Wellbeing Indicators are monitored quarterly (emergency admissions, emergency bed days, readmissions, falls admissions and delayed discharge bed days lost. Data is provided both at Dundee and Local Community Planning Partnership (LCPP) level (where available). Data is currently not available for eight out of the 13 National Indicators which are not reported using The Health and Social Care Experience Survey (see section 4.3). The Scottish Government and Public Health Scotland are working on the development of definitions and datasets to calculate these indicators nationally.

The National Health and Wellbeing Indicators 1-9 are reported from The Health and Social Care Experience Survey administered by the Scottish Government which is conducted biennially. Full details were provided to the PAC in February 2021 (Article V of the minute of the Dundee Performance and Audit Committee held on 3 February 2021 refers). The Scottish Government changed the methodology used to filter responses to reflect people who receive services from the Partnership and therefore it is not possible to longitudinally compare results for National Indicators 1-7 and 9.

The quarterly performance report also summarises performance against indicators in the Measuring Performance Under Integration (MPUI) suite of indicators for four out of six high level service delivery areas – emergency admissions, emergency bed days, accident and emergency and delayed discharges, end of life and balance of care. In November 2020 the Performance and Audit Committee agreed that targets should not be set for 2020/21 for these indicators, however that the indicators should continue to be monitored in quarterly performance reports submitted to the PAC (Article VI of the minute of the Dundee Performance and Audit Committee held on 24 November 2020 refers).

National data is provided to all partnerships, by Public Health Scotland. This data shows rolling¹ monthly performance for emergency admissions, emergency admissions from accident and emergency, accident and emergency attendances, emergency bed days and delayed discharges. Previously Public Health Scotland were only able to provide data for all ages, however following feedback from Dundee and other Partnerships they have now provided data for people age 18+.

It was agreed at the PAC held on 19 July 2017 (Article VIII of the minute of the meeting refers) that local data, provided by the NHS Tayside Business Unit will be used to produce more timeous quarterly performance reports against the National Health and Wellbeing Indicators. NHS Tayside Business Unit has provided data for emergency admissions, emergency bed days, readmissions, delayed discharges and falls.

Data provided by NHS Tayside differs from data provided by Public Health Scotland (PHS); the main differences being that NHS Tayside uses 'board of treatment' and PHS uses 'board of residence' and NHS Tayside uses an admissions based dataset whereas PHS uses a discharge based dataset (NHS Tayside records are more complete but less accurate as PHS data goes through a validation process). As PHS data is discharge based, numbers for one quarter will have been updated the following quarter as records get submitted for those admitted one quarter and discharged a subsequent quarter. By the time PHS release their data, records are (in most cases) 99% complete. The data provided by NHS Tayside Business Unit is provisional and figures should be treated with caution.

¹ For Q1 the data is for the period 1 July 2024 – 30 June 2025.
