Deprivation

The Scottish Index of Multiple Deprivation (SIMD) is the Scottish Government's official tool for identifying places in Scotland suffering from deprivation. Deprivation in this context refers to the range of problems that arise due to the lack of resources or opportunities covering health, safety, education, employment, housing, access to services and financial aspects. The most recent SIMD was released by the Scottish Government in August 2016.

Table 1 outlines data zones within each community area ranked within the 5%, 15% and 20% most deprived datazones of each SIMD and what percentage of the population live in these data zones. In The Ferry LCPP area there are no datazones ranked within the 5 to 20% most deprived therefore no population data.
